

HomeWorks Application

HomeWorks Incorporated is a service company that connects homeowners with reliable service technicians who can perform a variety of home repair and maintenance services. It maintains a list of certified contractors and guarantees the quality and timeliness of work provided. The company makes its revenue by taking a percentage of work booked through the service.

The company would like to expand the service they provide to include an application that will not only allow customers to get bids from contractors easily, it will also provide tracking and guidance on when standard home maintenance is due to be performed.

HomeWorks Sitemap

NOTE: Signing in will take the user to the Access Property Profile page. If the user only has one property it launches that page directly. If the user is a contractor it launches the Contractor Access page.

NOTE: If an item on the Property Profile is due for maintenance, the user can launch the Create New Project page from there. Reminders let the user set up reminders by maintenance category, and also for bids and invoices.

NOTE: When checking bids received, the user can launch the Contractors Page directly from there to check their profile, including ratings. Questions and answers can be exchanged with contractors too. Payment invoices can be checked and paid on The Access Payment Invoice page.

NOTE: The Contractor Access page allows contractors to see projects available for bid, check status of bids placed, send invoices, check status of invoices, respond to ratings, and maintain their profile page.

1.0 Home

The Home screen provides buttons to access the main screens. It also contains a button to go directly to the 'How to Use this App' page, which contains tutorials on the app functionality.

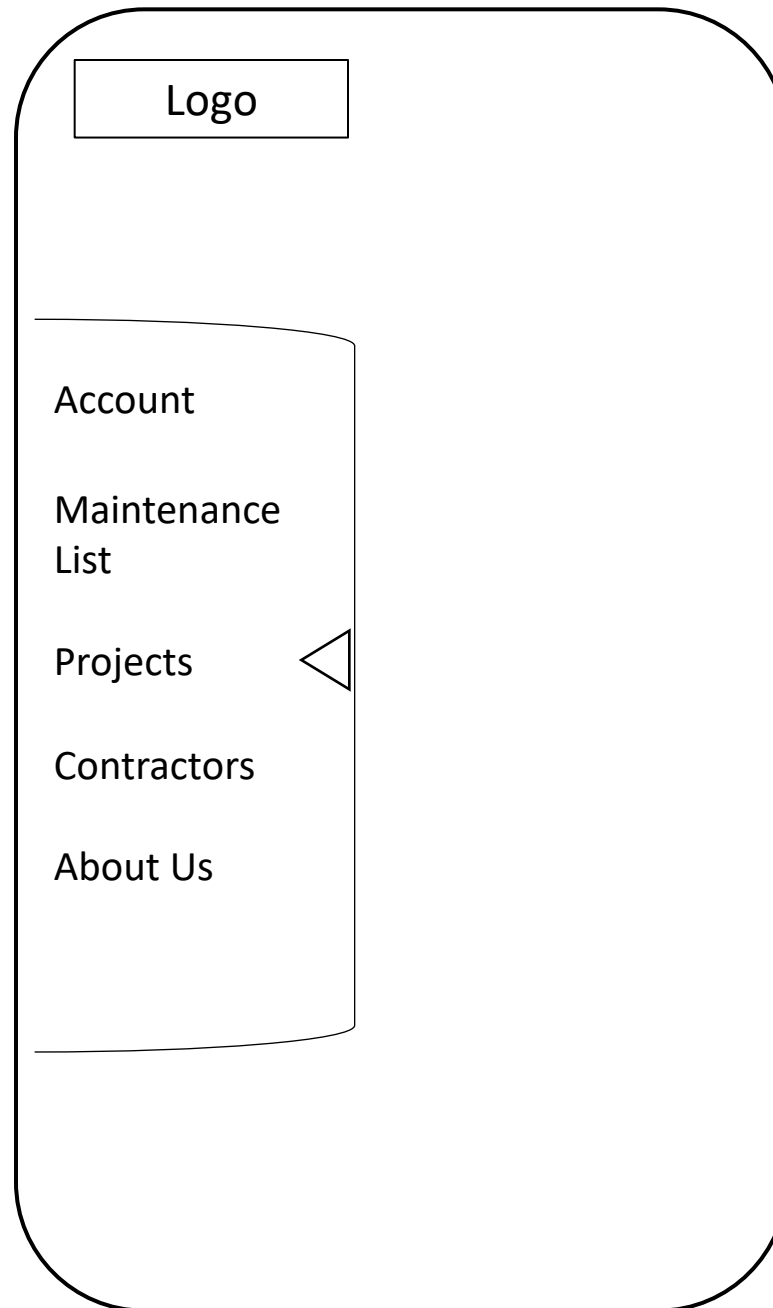

All Screens

Clicking the logo returns the user to the Home screen.

Clicking the arrow makes the menu slide out from the left on any screen the user is on (other than Home) to provide access to other screens.

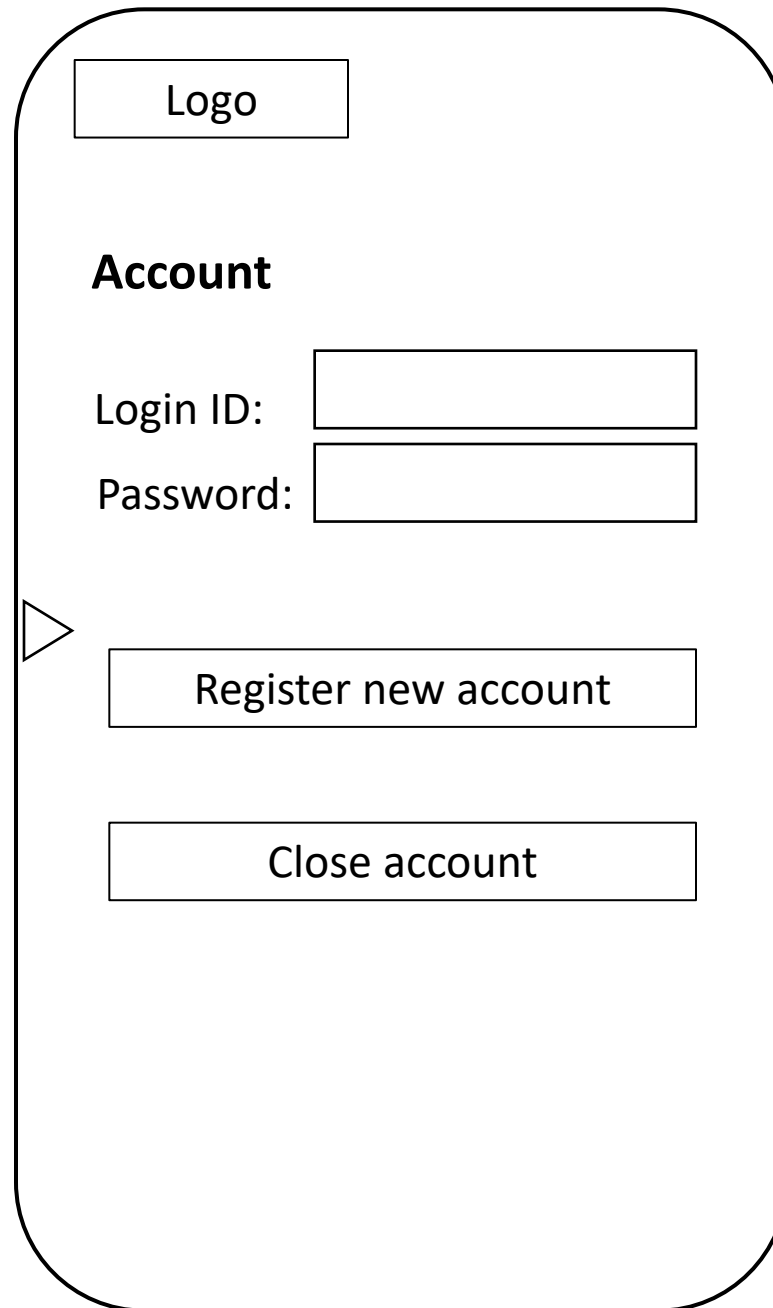

This is to provide convenient navigation for the user.

2.0 & 2.2

Account

Upon login, if there is only one property on the account it will take the user to the maintenance list for that property. If there is more than one property, it will take the user to the main maintenance list screen.

The diagram illustrates a mobile application interface for account management. It features a rounded rectangular container with a black border. At the top, there is a rectangular box labeled "Logo". Below this, the word "Account" is displayed in a bold, black font. Underneath the title, there are two input fields: the first is preceded by the text "Login ID:" and the second by "Password:". To the left of the "Register new account" and "Close account" buttons, there is a small, hollow right-pointing triangle. The "Register new account" button is positioned above the "Close account" button, both being rectangular with black borders and centered text.

3.0 & 3.2 Maintenance List

There is a button
to access the
maintenance list
for each registered
property.

3.1 Create New Property Profile

If the 'Same as mailing address' button is clicked the address fills in from the account registration.

The drop-down menu for the 'Construction Type' field is Brick, Wood Siding, Vinyl Siding, Other (which creates text box to fill in)
